

Lawn-Fix Self Adhesive Tape

A special tape for seam bonding artificial grass used as lawn or leisure areas

INTRODUCTION

Lawn-Fix tape is a simple way of bonding the two edges of artificial grass strips used in leisure and landscaping installations. The use of Lawn-Fix self adhesive tape can, in some circumstances, eliminate the use of liquid adhesives and a separate jointing tape, thus avoiding the time consuming application and spreading normally required.

The tape is constructed by having a layer of adhesive attached to a textile base carrier. The adhesive layer is then protected by a silicon release paper that is removed before use as described below.

This method of forming an invisible joint to a laid surface is simple and effective. However the bonds achieved are not as strong as that achieved by the Envirostik liquid adhesives, Wet-Fix or AquaBond, therefore we recommend that Lawn-Fix is mainly suitable for installing areas of lighter traffic.

FEATURES

- Single solvent free material to affix the artificial grass edges.
- Suitable for use on both indoor and outdoor surfaces.
- High Tack allows repositioning before final pressure applied.
- Flows into substrates and thus works well on rough surfaces.
- Convenient roll size for ease of handling.

PRODUCT CHARACTERISTICS

Colour & Form:	Spun bonded polyester 100g/m ² with 1mm thick butyl rubber	
Roll Sizes:	Length:	20 m.
	Width:	150 mm.
	Thickness:	1.45 mm.
	Mass per unit area	1.65 g/m ²
Average Peel Strength: NEN-EN 12228	(CD):	> 100N/100mm.
Average Tensile Strength: NEN-EN 12228	(CD):	> 50N/100mm.
Temperature Stability:	-5°C to +40°C.	
Storage:	0 to 30°C.	
Packaging:	2 or 4 rolls per box	

APPLICATION

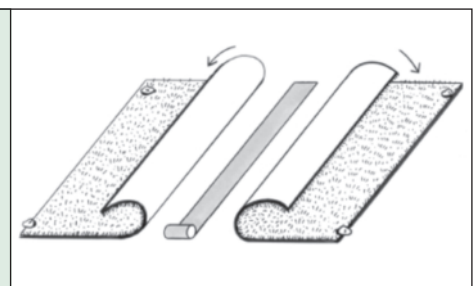

Step 1:

Roll out the artificial grass in parallel strips. The edges should touch.

Step 2:

Bend the edges back and install the tape between the rolls where the seam will be folded; adhesive side up.

Step 3:

Remove the protective foil.

Step 4:

Fold the edges back onto the tape. Ensure that the grass fibres do not touch the surface of the adhesive. Press the seam firmly.
